

## COOLING TOWER 825

### ABOUT THE UNIT

ICS Cool Energy's Cooling Tower 825 is a flexible twin fan unit capable of managing 101.4 m<sup>3</sup>/hr flow. The unit requires a water source to top up the evaporation and has quick-release water connections, together with a 63amp 3-phase power connection to manage the controls and fans.

The unit is designed for the UK market and for the adherence of ACoP L8 site maintenance requirements.

Customers should note that no Cooling Tower will be delivered to site until a full site specific risk assessment is agreed, together with a declaration of known tasks prior to delivery, to meet all Health & Safety codes of practice.
