

EVAP COOL 60

FEATURES

The Evap Cool 60 is a freestanding unit and can direct cool air in well ventilated areas in size of up to 80m² with the assistance of an adjustable fan speed controller. The unit operates by a totally natural process of evaporation without the use of refrigerants. The air is cooled by passing over a large wet filter pad with the production of no harmful products – just cool fresh air. Installation takes minutes and the low weight of 18kg makes it really easy to move around. The unit holds a maximum of 60litres, which requires topping up as and when required.
