

# FUEL MANAGEMENT SERVICE

---

Discover our 'no worries' fuel service to reduce your carbon emissions, including fuel sales, delivery and fuel management for your boiler and heating hire

#KEEPINGINDUSTRYRUNNING

# FUEL MANAGEMENT SERVICE

Along with your boiler, fuel tank and IDF heating hire, we offer you complete peace of mind with our fuel management service. We offer fuel sales and deliveries or an all-encompassing solution, including nationwide fuel monitoring and fuel management, as part of your hire agreement.

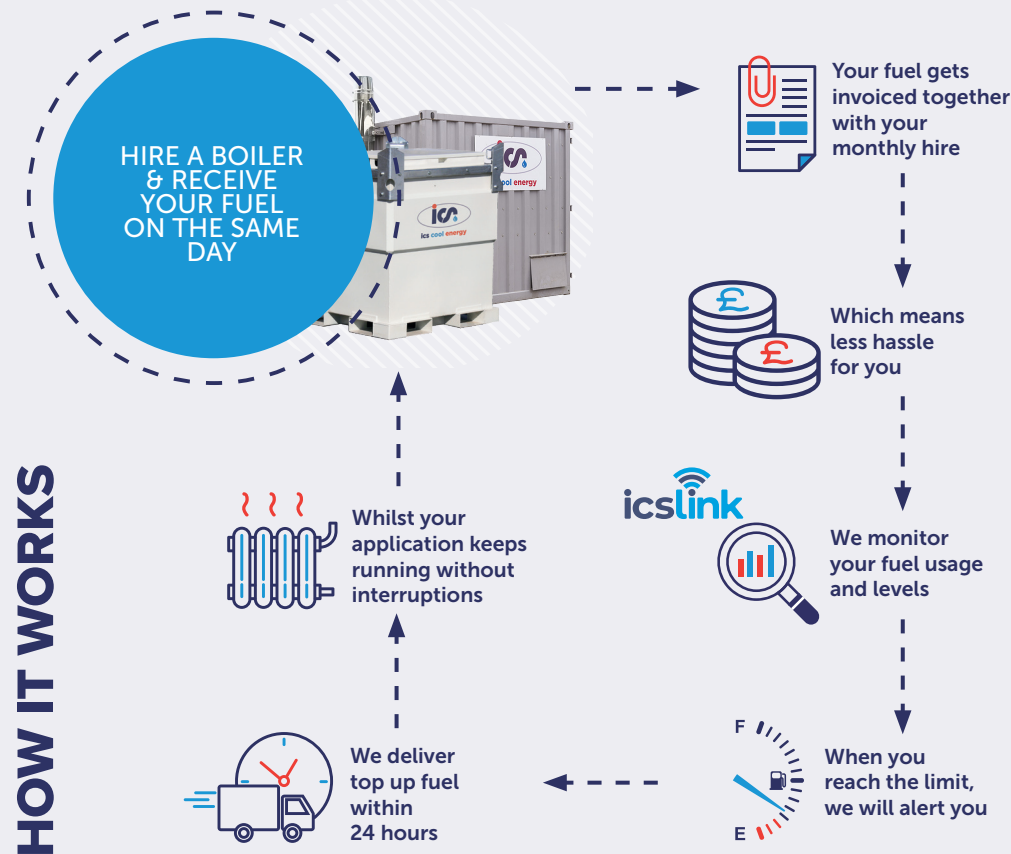

We track your fuel levels via GPRS or GSM using ICSLink, our remote monitoring service, to provide real time information and fuel level alarms throughout your project without having to visit site.

If you choose a complete fuel monitoring service, we can manage the whole process for you by keeping your system topped-up and alert you of any required fuel deliveries. We then deliver fuel to your premises within 24 hours.

The cost will be invoiced with your monthly hire – keeping it simple and hassle free for you, whilst your process is running uninterrupted.

Furthermore, we can provide you with a monthly report detailing your fuel use, record of alarms and fuel orders with us.

## e-Mission CRITICAL

At ICS Cool Energy, we have an obligation to help reduce all potential impacts upon the environment, whilst saving our customers' energy and reducing their costs.

Our E-Mission Critical initiative aims to reduce carbon emissions by 1 billion metric tonnes by 2030. With sustainability at the core of our business, we are here to help your organisation reach any targets you have set.

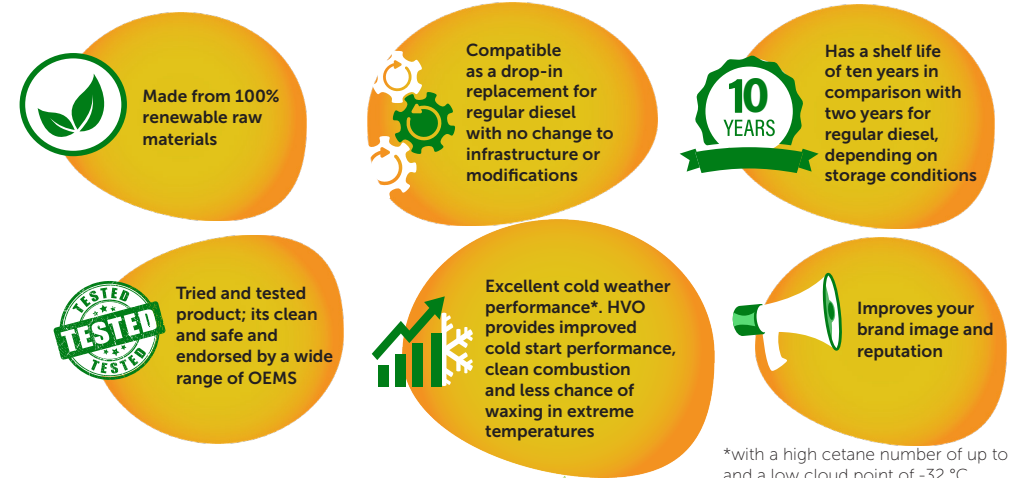

## INTRODUCING RENEWABLE FUEL

From the 1st April 2022, we will be introducing Hydrotreated Vegetable Oil Fuel (HVO) into our product portfolio.

By making the transition to HVO by replacing fossil fuel for either on or off-road applications, a **90% reduction in net Co2 Greenhouse Gas emissions** and a significant reduction in Nitrogen oxide (NOx) and particulate matter (PM) can be achieved.

### WHAT ARE THE BENEFITS OF SWITCHING TO HVO?

\*with a high cetane number of up to 90 and a low cloud point of -32 °C

### DID YOU KNOW?

For every 1,000 litres of diesel burned, you will produce 3.6 tonnes of greenhouse gas CO<sub>2</sub>, compared to just 195kg GHG CO<sub>2</sub> for every 1,000 litres of HVO burned.

**SWITCH TODAY**  
TO IMMEDIATELY REDUCE YOUR CARBON EMISSIONS!

# PROCESS TEMPERATURE CONTROL SPECIALISTS.

ICS Cool Energy are specialists in temperature control solutions from -40°C to 400°C for critical and manufacturing processes including rental, capital equipment, planned preventative maintenance and emergency breakdown support across all industries Europe wide. For over 30 years, we've been providing technical advice and solutions to leading companies, world-wide – helping them to meet compliance, reduce their energy consumption, maintenance and operative costs.

## KEEPING INDUSTRY RUNNING

- Rental, equipment & service
- Consultation & technical expertise approach
- Emergency support 24/7 every day of the year

## EMISSION CRITICAL

- Reducing carbon by One Gigaton by 2030
- Free Cooling & Heat Recovery products
- Energy Efficiency enhancements

## FLEX

- Zero capital membership solution
- Flex capacity to pay only for what you need
- Built in contingency planning

## UK & IRELAND COVERAGE

- 📍 UK Depots
- 📍 Regional Offices
  - 70+ Service Technicians with Van Stock
  - 40+ Sales Engineer Consultants
  - 30+ Depot Repair Engineers
  - Major Account Management Team
  - £50M+ 500MW Fleet
  - 6,000+ Customers
  - 24/7 Emergency Support
