

# TEMPORARY HEATING ALLOWS UNINTERRUPTED POLICE HELICOPTER OVERHAUL

## The Challenge

In order to remain flying, the police helicopters must be regularly maintained and overhauled. This work can only be carried out in a temperature controlled environment to allow the aviation engineer to work safely. When their heating system failed at a regional airport, this left the police helicopter grounded. The heating system was urgently required.

ICS Cool Energy

"A quick response was required to help this vital service to the public to continue uninterrupted and we were privileged to be able to lend assistance by providing a rapid responsive."

## WE MAKE IT WORK

### The Solution

Following a site survey a 40kw electrical heater was specified. This replaced the sites gas powered heater which had broken down. The failure was due to an interruption of the gas supply. The electric heater was installed complete with a generator to provide the electrical power complete with a bulk fuel tank to ensure enlarged operation between refuelling.

### The Result

Within 4 hours of calling ICS Cool Energy the police helicopter was overhauled by the aviation mechanic and pronounced air worthy. Bringing this vital part of policing back into play.

“ I have used ICS to supply temporary cooling solutions for years and they never let you down. They will turn around a potential disaster by the exceptional service they provide and will guarantee that the kit will be fully installed and working in a matter of hours.  
Great job Thanks for everything.
