

# TEMPERATURE CONTROL APPLICATIONS FOR HOSPITALS AND HEALTHCARE

## HEATING AND HOT WATER

A constant supply of heating and hot water throughout the year is essential for both patient comfort and hygiene.

When boilers fail, it is important that things are running again quickly. ICS Cool Energy can provide boilers up to 2MW and remote fuel management solutions for all domestic hot water and heating needs, ensuring a steady supply of both.

## COMFORT COOLING FOR PATIENTS AND STAFF

Keeping patients and employees cool as temperatures rise outside is important and allows you to ensure a high quality of care to those who need it.

With flexible and complete packages, from single units to multi-megawatt HVAC applications – we have the equipment, technical expertise and experience to help in any situation, from emergency plant equipment failure to long term replacements.

## COOLING FOR ALL CRITICAL HEALTHCARE APPLICATIONS

Our chillers are suitable for all requirements in the healthcare sector. From MRI machines, PET scanners and pharmacies to essential HVAC cooling for wards, theatres and more – ICS Cool Energy provides equipment that delivers the level of precision required in these critical areas – with in-built redundancies to ensure no loss of service.
