

ON CALL AND TO THE RESCUE FOR MANUFACTURING

The Challenge

It's a manufacturing nightmare when breakdowns happen and it's always at exactly the wrong moment. That's where the ICS Cool Energy's hire team steps in with a fast rescue, on site day and night to minimise revenue loss and restore business as usual.

ICS Cool Energy:

"We're problem solvers, on call 24/7. Our main aim is to keep your business running."

WE MAKE IT WORK

The Solution

Whatever the industry – from food processing, pharmaceuticals, plastics, retail, leisure, datacentres, healthcare and everything in between – whether it's a global brand or niche producer, there's one important goal in common: Preventing production failure and ensuring the best help is at hand for a fast fix if the worst happens – and that's where ICS Cool Energy's hire solutions are the market leading choice and the first point of call.

THE SOLUTION

- National network of engineers, skilled at creating bespoke solutions
- Telephone helpline
- Extensive range of parts and products in stock for rapid delivery

PRODUCT SELECTION

- High efficiency chillers, heaters, heat pumps, boilers and cold stores
- Electric boilers, tanks, cooling towers
- Remote controls and accessories including fuel cubes, pumps and water tanks

The Result

In one of ICS Cool Energy's recent projects a maintenance manager called in the experts following a serious breakdown.

"We knew the chiller was old but we hoped to keep it going for another year before making the new investment. But when it stopped, we were in trouble and losing money by the minute."

A hire sales engineer was on site very quickly and a 350kW chiller was delivered and fully installed the next day, getting production going again.

"I was impressed by the fast response and the number of options we were offered. The hire system is more efficient than our old unit and includes run and standby pumps which we will want to build into our new system" he added.
