

SPOT COOLER 7.3 V2

Why cool the whole building when you can cool the area most affected by heat?
This approach saves costs and power usage while installation takes minutes.

FEATURES

This single fan spot cooler with large volume air movement of 1,020m³/hr is ideally suited to cool server rooms, production areas and workplaces.

The ICS Cool Energy Fral Blizzard unit has been designed for a fast rental installation and start up. The unit operates from a standard 13amp single- phase supply and has a single 12" heat rejection hose, together with a 15 litre condensate container.

In addition to this, the unit is entirely portable and has castors with brakes. This allows for easy movement when cleaning around this lightweight unit.

FEATURES

The Fral Blizzard (25,000 Btu/hr) is a freestanding unit and can direct cold air to specific areas by utilising the twin adjustable air ducts situated in the front of the unit.

The unit is capable of spot cooling electrical cabinets, personnel in bakery areas, computer suits, server rooms and packaging halls where localised cooling is required.

Dimensions (L x W x H)	mm	620 x 500 x 1,250
Weight	Kg	85
Air Connections	-	12" (305m) & 6" twin ducts
Air Flow	m ³ /hr	1,020
Current consumption	Amps	12
Power Supply	-	230/1/50Hz (1.5mm ²)
Max Power absorbed	kW	2.5
Power Connections	-	13 amp standard plug
Power Sound Level	dB(A)	55 @ 10m (max fan speed)
Nominal cooling duty	kW	7.3 @ 22°C in 28°C ambient
