

ICS Cool Energy temperature control units, models i-Temp ci are heating and cooling units built for performance. Using the latest technology they are built with maximum energy savings in mind.

i-Temp ci models are water units with indirect cooling, using an open tank up to 95°C and as a closed system up to 160°C.

There are two variants, one as a low cost entry model (version e) and one as an advanced unit with touchscreen, (version t).

Unit features include:

- Self optimising C8 advanced controller with high control accuracy (version t)
- Touch screen for log in, control and monitoring of process parameters (version t)
- Measuring, indication and monitoring of flow rate (version t)
- Return temperature indication (version t)

1) at 15°C cooling water temperature and 90°C resp. 130°C circuit water temperature
 2) not in combination with mould drain function
 3) not in combination with leak stopper

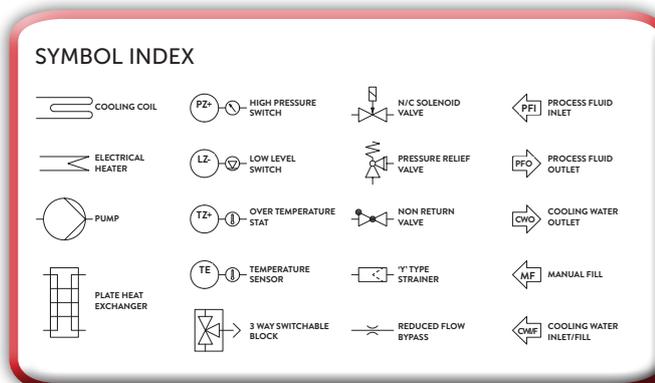

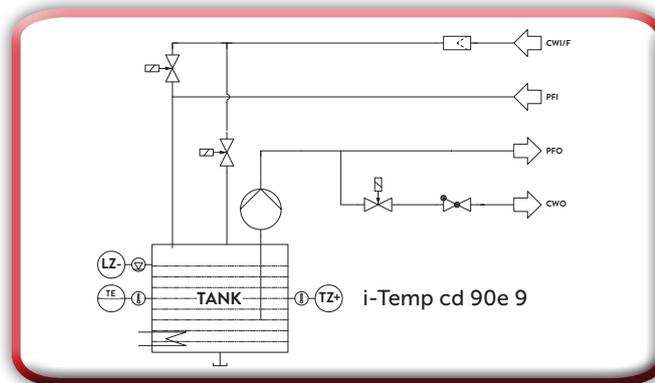

ICS Cool Energy temperature control units, models i-Temp cd are heating and cooling units built for performance. Using the latest technology they are built with maximum energy savings in mind.

i-Temp cd models are designed as water units with direct cooling, for usage up to 140°C.

There are two variants, one as a low cost entry model (version e) and one as an advanced unit with touchscreen, (version t).

Unit features include:

- Self optimising C8 advanced controller with high control accuracy (version t)
- Touch screen for log in, control and monitoring of process parameters (version t)
- Measuring, indication and monitoring of flow rate (version t)
- Return temperature indication (version t)
