

NEW OUTLOOK ON FREE COOLING IN THE WINDOW INDUSTRY

The Challenge

Plastics manufacturing cooling is among the most demanding and challenging of processes, renowned for high energy demands. UK and global legislative initiatives such as the CRC (Carbon Reduction Commitment) Energy Efficiency Scheme are creating additional impetus and pressure for businesses to find ways to save energy and reduce their carbon footprint.

ICS Cool Energy:

"A window manufacturer in the North East chose ICS Cool Energy's tailor-made hire solution. It was a choice that's paid for itself, slashing the energy bills by 70%, with overall savings of £20k."

WE MAKE IT WORK

The Solution

ICS Cool Energy's Dry Air Liquid Coolers can run alongside a pre-existing chiller supply, savings of 40-70% on electricity bills are regularly achieved. This is because the free cooler will take over automatically, switching off the compressors, when the external temperatures reach 5°Celsius below the set point.

A whole rental fleet of high efficiency (Class A) dry air coolers is available from ICS Cool Energy, backed by a full on site installation service, year-round 24/7 helpline and technical support from the industry leaders. There's a full range of hire solutions as well as sales and service for all types of industries and applications.
